Sir:

In response to the Office Action dated May 9, 2005, Applicants hereby elect Species A, of Figures 3-9. Claims readable on the elected species are claims 1-5, wherein claim 1 is generic. With indication of the allowability of independent claim 1, it is respectfully requested that the claims directed to the non-elected species be likewise indicated as being allowable over the prior art of record and passed to issue.

It should be noted that the present invention, as set forth in independent claim 1, is directed to a vibration proof mount device wherein the core body in the receiving member can usually revolve relative to at least one of a member of a vehicle body and a member of a power plant by a predetermined angle or more, such as, when the receiving member receives a force in the vertical direction without the action of a force in the vehicle body longitudinal direction.

Examination on the merits and allowance of the elected and non-elected species claims is earnestly solicited.

Should the Examiner believe a conference would be of benefit in expediting the prosecution of the instant application, he is hereby invited to telephone counsel to arrange such a conference.

Respectfully submitted,

Donald R. Studebaker
